Summary

Software Engineering graduate (B.Tech CSE, 2026) skilled in MERN stack (MongoDB, Express, React, Node.js) and Java. Interned at Celebal Technologies, building a real-time shipment tracking platform using React, Node.js, and Mapbox API. Certified in MERN Stack (RCPL India) and Java fundamentals (HackerRank). Seeking a full time opportunity to contribute to real world problem solving and grow as a software engineer.

Skills

Programming & Problem Solving: Java, JavaScript, OOPs, Data Structures & Algorithms

Frontend: React.js, HTML, CSS

Backend: Node.js, Express.js, REST API Design & Integration

Database: SQL, MongoDB, SupaBase

Tools & Practices: Git, GitHub, Postman, VS Code

Experience

React.js Intern

june 2025 – August 2025

Celebal Technologies (Remote)

Tools Used: React.js, node.js, express.js, Mapbox API

- Built and deployed a real-time shipment tracking platform using **React.js, Node.js, and the Mapbox API, developing 13+ reusable components and pages** across the frontend
- **Integrated 12+ REST API endpoints** for shipment creation, live location updates, status tracking, checkpoint management, and route distance calculation
- Implemented map-based visualization and history tracking for shipments, collaborating on a full-stack workflow from API design to UI rendering

Projects

AI Resume Analyzer | *React.js, node.js, express.js, Gemini API*

Full stack development

- Built an AI-powered resume analyzer that evaluates **100+** user's resume against a job description and generates an ATS-optimized version using **LLM-based** analysis
- Implemented PDF upload and text extraction pipeline, engineered prompts to ensure recommendations only reflect actual user skills (no fabricated content)
- Developed an automated resume review workflow that processed PDF resumes and generated detailed analysis reports in approximately **12 seconds**

Eco-Fridge | *React.js, MongoDB, firebase, JWT*

Full stack development

- Developed Eco-Fridge with React.js for real-time food expiry tracking, enabling users to monitor items and receive timely expiry alerts to reduce waste
- Built complete CRUD operations for food item management, handling edge cases like expired items and duplicate entries for robust functionality
- Secured user access using Firebase Authentication and JWT-based API authorization, validated via Postman

Certifications

- **MERN Stack Development – RCPL India (2025):** Hands-on training in building full-stack web applications
- **GFG 160 - 160 Days of Problem Solving – (2025):** Completed a structured 160-day challenge focused on consistent DSA problem-solving practice
- **JAVA Basic - (2024):** Validated core Java programming fundamentals
- **Database Management Systems (DBMS)– Udemy** Covered RDBMS design, SQL queries, normalization, and database management principles

Education

B-Tech Computer Science and Engineering

Graduated: 2026

Allenhouse institute of technology, kanpur

CGPA: 7.59 / 10
